Protect our waterways!
FREE hands-on sessions
You choose the location

Northland Regional Council is offering freshwater biosecurity education for schools and early childhood centres.

These sessions help tamariki and taiohi understand how to stop the spread of the invasive freshwater clam (Corbicula) and other freshwater pests.

We can offer -

- Interactive classroom activities and games
- Hands-on freshwater discovery experiences
- Identification of native and invasive freshwater species

When and where

During school and ECE visits, outdoor lessons, activity days, or events.

We will come to your school/centre or your activity location.

Register now!
